Navigating Change in Education in the Ever-Evolving Healthcare System

Moderators:
Megan Elam and Beth Stuchell

HEAL National Conference
Cincinnati, OH
April 30, 2019
Objectives

Participants will:

- **Identify** system-level changes in healthcare and education
- **Examine** the impact of changes in healthcare and educational programming in the pediatric healthcare setting
- **Explore** solutions to adapt programming in the context of the ever-changing educational and healthcare environments
Changes in Pediatric Healthcare

Increasing prevalence of youth living with chronic conditions

- Shift from inpatient care to outpatient care
- Improved mobility of those living with chronic illness

Improvements in medicine and technology

Changes in healthcare reimbursements and funding

- Increased transparency regarding cost of care
- Movement toward lean healthcare and equity in care
Changes in Education

Greater awareness of link between health and education

Increasing emphasis on “whole child” and mental health in educational setting

Greater utilization of technology and digital learning experiences
Programmatic Implications

Increased expectation of care coordination across settings

Discrepancy between demand for services and availability of resources

Greater need for creative solutions, integration of technology, and resources for stakeholders
1. Moderator questions for panelists
2. Guided discussion
3. Audience questions for panelists
Welcome, Panelists!
