## Inpatient School in the Seacrest Studio

- ❖ Process:
  - Worked with Studio Team to agree upon daily 1-hour time slot
  - Opportunities to connect with other Seacrest Studio collaborators and plan lessons accordingly (Children's Museum of Denver, Denver Zoo, Denver Aquarium Etc)
  - School is advertised to patients and families with regularly updated flyers, BBOY45 commercial slides, and mentioned by Studio Team throughout daily broadcasts
  - Therapy Teams are sent weekly lessons details to encourage participation with their patients
- ❖ Planning:
  - Teachers collaborate regularly and share lesson planning responsibilities
  - Weekly themes alternate bi-weekly from lower elementary content (K-2) to upper (3-5)
  - Lessons sent to various rehab groups on the Thursday prior (SLP, OT, PT, and/or neuropsychologist will treat patients bedside during studio school)
  - Executive Functioning Skills are emphasized throughout the week for rehab populations
  - Core skills targeted daily (math, reading, language, and STEM are regularly emphasized)
  - School BINGO Tuesdays with prizes to increase engagement and patient interest in studio school
  - Visuals: anchor Charts, manipulatives, videos, read alouds, completed teacher examples
- ❖ Create and group resources:
  - School team members are grouping resources used during the week to create "grab and go" lesson plans and activities for future use
- ❖ Distribute materials:
  - Every morning materials are delivered to rehab school program patients and other identified school patients throughout the hospital
  - Detailed instruction forms (*Get Ready, Do, Done*) are created and sent with materials to patient rooms in case patients are not able to follow along but would like to complete the activity later
  - Additional material bags are prepped for patients who call down for supplies during live broadcast
- ❖ Live Broadcast:
  - Patients encouraged to call down and participate on air throughout broadcast
- ❖ Patient Follow Up:
  - In person and via google classroom modules for BI population
  - Children/Families can send pictures, videos, and/or their finished product to be shared hospital wide by school team and studio staff
- ❖ Extensions
  - School team members have created self-paced, online academic modules using Studio School content
